

PRESS RELEASE

EnCon Companies Announces the Launch of a New Website

Denver, Colo. (July 2, 2010) – EnCon United is pleased to announce the release of its redesigned website. The innovative new sites of EnCon United, EnCon Washington, EnCon Northwest, EnCon Colorado, and EnCon Utah, created by an in-house team, embody EnCon’s forward-thinking vision and commitment to the growing needs of the precast industry.

The new sites offer:

- rich content provided by staff from across the companies
- direct access to technical design resources
- green resource information
- detailed precast product, system, and market segment information

Each of the subsidiary site’s homepages welcomes visitors with bold new colors, a clean uncluttered design, and changing images. Featured content centered on EnCon’s mission to advance the knowledge of precast and further its use is focused on every page.

In the midst of new and limitless web technology, changing information needs, and the introduction of new precast applications, it was time for a comprehensive overhaul of how EnCon presented their information to the public.

The websites are easier to use and navigate, reflect a diverse range of information, and provide increased flexibility for future growth. They will greatly improve the experience for users of the site as EnCon moves ahead into new realms of precast use in the future.

Please take a moment to peruse the new sites:

- www.enconunited.com
- www.enconwashington.com
- www.enconnorthwest.com
- www.enconcolorado.com
- www.enconutah.com

About The EnCon Companies

The EnCon Companies are specialty contractors providing precast/prestressed concrete systems and services to all facets of the construction marketplace. In addition to the corporate offices and the design group, both headquartered in Denver, Colorado, EnCon Companies maintains nine manufacturing facilities nationwide. Recognized as one of the leading precast companies in the United States, EnCon is pioneering the use of the latest technology for the design and fabrication of precast structures. For more information, visit www.enconunited.com.
