

## PRESS RELEASE

### Stresscon Announces Employee Transitions

Denver, Colo. (January 9, 2015) - Stresscon Corporation, a leading architectural and structural precast prestressed concrete company, is pleased to announce recent changes to its corporate management team. Employee Rob Hixon is now in Preconstruction Services, working with both the Denver and Colorado Springs offices. Rob has over seven years experience with the Stresscon team, serving as Project Coordinator, Estimating Coordinator, and serving as Lead Project Coordinator on several signature projects. In his current role, Rob is responsible for providing estimating services, business development, strategic planning, new product development, and working with clients during early project development stages to realize beneficial building solutions.

Stefan Kalbli has transitioned to the role of Project Manager, working with both the Denver and Colorado Springs offices. Stefan has been a part of the EnCon Design team, working closely with Stresscon as a Design Engineer on numerous projects over the past six years. He received licensed Professional Engineer status in the state of Colorado in June 2014. In his new role, Stefan will offer preconstruction and design assistance services, compose project estimates and proposals, and coordinate efforts between Stresscon's internal team and the client's design team on individual projects. Stefan is excited about his transition and looks forward to the challenges and opportunities presented by his new Stresscon Project Manager position.

Stresscon is also pleased to announce the promotion of Justin Kennedy to Plant Superintendent. In his new role, Justin will be responsible for production, planning, scheduling, plant resources such as budgeting and personnel, inspections, and quality assurance. Justin has been employed with Stresscon for over 17 years. His previous company experience includes welding and cage building, and serving as Welding Foreman and Production Foreman. Justin has also spent time working at the EnCon Utah and EnCon Washington plants. He is enjoying the challenges of his new position and looking forward to being a part of the future of Stresscon.

#### **About Stresscon Corporation**

Stresscon Corporation designs, fabricates, and erects quality structural and architectural precast concrete structures for the construction communities of Colorado and the Rocky Mountain region. Founded in 1967, and a member of the EnCon Companies since 1993, Stresscon is PCI certified and specializes in institutional and commercial applications.
