

AIA/CES Registered Box Lunch Programs

AIA/CES is a continuing education system developed by AIA that emphasizes learning and records professional learning as a requirement for architect membership. It enables architects to keep current, master new knowledge and skills, plan for the future, and responsibly meet the role society entrusts to a professional. In doing so, it has the potential to be one of the primary forces in the improvement and revitalization of the architectural profession.

EnCon United Company is a registered provider through our unique relationship with the Precast/Prestressed Concrete Institute (PCI), www.pci.org and AltusGroup, www.altusprecast.com.

Architects and Engineers can learn about precast concrete hollow-core floors, architectural precast concrete, precast parking structures, and glass or carbon fiber reinforced concrete.

The following are authorized boxed lunch programs or full day seminars provided by PCI and AltusGroup. Each is approved by AIA and each qualifies for Health, Safety & Welfare (HSW) credit or Sustainable Design (SD) credit.

To request more information on any of the programs and/or to request a program presentation at your office, please contact EnCon United Company.
