

PRECONSTRUCTION SALES AND PROJECT ENGINEER

Division	ASC
Location	Buchanan, GA
Job Title	Preconstruction Sales and Project Engineer
Reports to	General Manager

GENERAL DESCRIPTION

Atlanta Structural Concrete Company (www.Atlanta-Structural.net), a highly respected specialty contractor and manufacturer of structural precast prestressed building components, has an immediate opportunity for a Preconstruction Sales and Project Engineer in its Buchanan, GA office.

RESPONSIBILITIES

The primary responsibilities include: preconstruction engineering design assistance, product design, and technical support of manufacturing and field operations for safe and efficient production, transportations and construction of precast prestressed concrete structures.

Individual will interact with the construction community, at all levels, including general contractors, architects, engineers and owners/developers to provide design and construction input to the design team. Individual would be responsible for developing the required precast designs and details for assigned projects.

PERFORMANCE REQUIREMENTS

Minimum two years of experience working with a PCI Certified Plant. PE registration preferred or the ability to obtain PE registration within a short period of time. Engineer in Training Registration required at a minimum. PCI Quality Control certification desired. Ability to read and understand construction drawings and specifications is required. Candidate must have good communication skills and be a detailed oriented person. Must have the ability to work independently as well as in a team environment with the customer and project design team.
